

CLEARVIEW

- Displays various Visual and Audio Information
 - Portable & Lightweight @33 grams
- Modular Design allows for varied customizations
- Can be connected to Android Smartphones for better integration of the Glasses
 - Designed for Extended duration uses

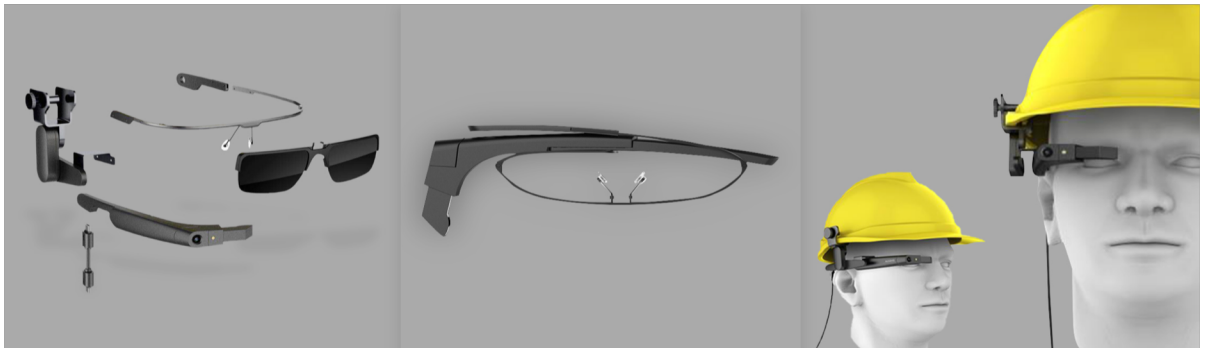

CLEARVIEW

The ClearView is :

- A spectacle equipped with a camera and an in-built screen
- Very Light at 33 Grams
- A spectacle with In-Built Visual Analytics
- A spectacle that does not emit radiation or energy to the user
- Modular designed allowing for various customisations

MODULAR DESIGN

APPLICATIONS

Face recognition

- Dynamic facial recognition
- Automatic face detection
- Quickly identify/ extract information
- Realtime display
- Large data analysis engine
- Built-in algorithm, accurate identification

License plate recognition

- Adapted vehicle information systems
- Quick license plate recognition
- Extract vehicle information
- Fast response for law enforcement
- Real-time feed back
- Improve processing efficiency

Mobile enforcement

- Task status check
- Hands-free operation
- Two-way communication, fast processing
- Cloud storage of data

Remote access

- Wireless Data return
- Two-way communication
- Remote assistance
- Realtime control of the background
- Realtime dynamic scheduling

Camera	Display	Interaction
1300 Pixel CMOS sensor	0.26inches 640 X 360 resolution	Touch panel
OIS Optical image stabilization	OLED display(equivalent to 2 meters 32-inch screen)	
3A Professional image adjustment	Display angle adjustment	Smart Voice
Support 1018p Full HD video		
Camera angle adjustment		
Interaction	Others	Accessories
Touch panel	Compatible with Type-C and micro USB interfaces	USB Type-C data cable
	Alloy folding frame	Mirror frame(Compatible with close up, solar lens)
Smart voice	Adjustable nose pads	Cleaning cloth
		Helmet mounting bracket
